

## Results

After one year, what were the average improvements for these publishers?

Monthly Traffic Increased By... +85%

Avg. EPMV Increased By... +123%

Total Revenue Increased By... +259%

New Organic Keywords Increased By... +24%

## Publishers see significant growth using Ezoic

We looked at 50 websites that started using Ezoic in early 2018 and continued using the platform until January 2019. Sites in the study were many different sizes, in separate content verticals, and based in countries from all around the world.

Websites using Ezoic were able to grow at an unprecedented rate once they started using the platform. On average, these sites saw dramatic increases in website traffic and monthly revenue. Results included organic traffic and organic keyword ranking improvements alongside substantial lifts in ad session revenue and total monthly revenue.

The large average improvements in both revenue and traffic were driven by a core group of publishers that saw exponential results; however, almost all publishers saw unprecedented year over year growth using Ezoic. While the Ezoic platform is not solely responsible for these improvements, Ezoic's core features can be credited as a driving force behind the results.

“Ezoic is enabling us to grow our business instead of just meeting the bills.”

Anita Campbell - Founder & CEO, SmallBizTrends

## Averaging all the results

The average website saw **90,091 more monthly visitors** after using Ezoic for 1 year

At the end of one year, the average site was **making \$1,720 more revenue** each month

After using Ezoic for a year, the average site **increased earnings per 1,000 visitors by \$4.46** The average site **added 1,222 organically ranked keywords** over the course of one year with Ezoic

# Data From Each Publisher

These 50 publishers represent the sample used to review the progress of publishers that started using Ezoic in early 2018. All of the publishers began using Ezoic in January of 2018 and continued to use the platform until the start of 2019.
