

We've recently built an exclusive Income School support team and have worked closely with Project 24 and Income School to provide data and information on Ezoic policy requirements, when the best time to begin displaying ads is for new sites, and how to maximize the value of all ads for any site — big or small.

What you should know about the advantages Income School members have with Ezoic:

1. **No pageview limit...** We've removed all pageviews restrictions and limits for Income School members and defer to the curriculum developed by Income School and Ezoic. If you have any questions about this, consult the updated curriculum or the Ezoic portion of the Income School community.
2. **Must meet basic standards.** Applying through the [Income School portal on the Ezoic site](#) ensures your site will be approved to use Ezoic assuming that you meet our basic quality standards. These are derived from many of our ad network partners that compete for ad space on our sites. Here are the main areas we review.
 - a. [Content must be original](#)
 - b. [Traffic must be authentic and human](#)
 - c. [Content categories must not be on prohibited list](#)
3. **Onboarding done by an expert team.** To ensure the best possible experience for all Income School community members, Ezoic has trained a sales and support team specifically onboard, assist, and service Income School and Project 24 members. This includes helping with the curriculum for the program and performing custom onboarding. This means that after submitting the form to join, or re-join, Ezoic that members will be directly communicated with and assisted by our team.
4. **No long waits, no pretend exclusivity.** Our team will take all sites that submit applications through the portal and ensure that our quality team quickly reviews them. From there, the team may request further information to help you get your site live. If you have any trouble with your experience, please be sure to let our executive staff know through [our direct feedback form](#). There's no secrets or special ad demand. All sites should be able to earn the maximum revenue possible with Ezoic and we have a team setup to help you achieve that without feigned exclusivity and full transparency in our process.
